

## **PanaShade Instructions**

After many requests for a one piece solar privacy shade for PanaView one piece windshields we have created this kit.

The decision to produce a PanaShade in kit form will allow you to trim the shade material and install the suction cups in the proper placement for your particular windshield. One-piece windshield shapes vary by manufacturer so this kit will provide you all you need to customize a PanaShade to the perfect fit for your coach.

Our suggestion would be to start in the center and move to the outside. You can find the center by measuring. Many just fold the material in half and mark the center with a paper clip or marking the top center with a piece of chalk. If you are removing a large amount of shade material from one end you will want to again find and mark the center of your cut shade. If you are concerned that the one piece shade may be too large for you to comfortably install you can simply cut it into two pieces leaving an overlap in the center. Remember the finished shade should be quick and easy to install to insure you will use and enjoy your RVQuickshade every time you stop.

**\* Trim your RVQuickshade only after you are confident of the final shade fit.** The fabric does not ravel when trimmed so it always wise to undercut. You can fine tune after you have lived with your new PanaShade for a time. Folds and creases will disappear as gravity and the sun do their work. This process can be accelerated with the aid of a hairdryer on its lowest setting.

Install the suction cups in the finished hem along the top starting in the center and working your way to the outside with apx. 15" spacing. To install the suction cups simply push an Awl or an ice pick into the fabric to separate the weave 1" from the top of the shade then insert the plastic tack into the hole & press the tack into the suction cup. The suction cups can be adjusted if needed (twist the tack out of the suction cup and reinstall).

**Remember to remove before driving!** Softly roll up your new PanaShade when not in use to prevent fold marks. Many just lay the PanaShade across the bed until the next destination.

Thank you again be cool and enjoy the views!
